**Protect your staff. Protect your budget. Protect your career.**

Efficient jail classification is not just about logistics —it's about legal survival. Failure to properly classify inmates leads to "duty to protect" violations, increased violence, and devastating Section 1983 lawsuits.

**ARE YOUR CLASSIFICATION POLICIES DEFENSIBLE IN COURT?**

"Best practices" won't protect your qualified immunity. Only adherence to clearly established law will.

In a world of increasing litigation, your classification system is either your strongest shield or your greatest liability. This legal-based Jail Classification seminar moves beyond "how we've always done it", to a system rooted in current case law and state statutes.

**WHAT'S AT STAKE?**

- Duty to Protect: Identify "red flags" before they become violent incidents.
- Due Process: Ensure disciplinary re-classifications meet constitutional standards.

This intensive training program focuses on objective classification basics:

- **Liability Reduction:** Learn how to document classification decisions to withstand judicial scrutiny.
- **Dynamic Re-Classification:** Recognizing behavioral shifts that warrant a classification reassessment.
